

Africa Agriculture Geospatial Week (AAGW) 2010, ILRI Campus, Nairobi, Kenya, June 8-12, 2010. Jointly organized by the [CGIAR's – Consortium for Spatial Information \(CSI\)](#), [HarvestChoice](#), an agriculture investment targeting program and [AGCommons](#), a geospatial information program based in Africa, as well as other public and private sector partners. The AAGW 2010 will not only bring together experts and practitioners working on cutting-edge agricultural applications of GIS and remote sensing data and technologies to advance agricultural development in Africa, but will also include a “GIS ShareFair”, a market place consisting of exhibitors, training sessions, and thematic workshops in addition to interactive presentation sessions and the third [WhereCampAfrica](#). An excellent opportunity to share ideas and knowledge on Geospatial Information Services for agricultural development, you can learn more about this event at <http://africaagriculturegisweek.org/> . To participate, please register by sending an email to: registrations@africaagricultureGISweek.org .
